Subject: Water Based Maskant Pilot Tank Leak

Approximately 450 gallons of CAX-100-LA water based maskant recently leaked into the secondary containment pit from the MR&D pilot tank in A-3192. Maintenance crews began cleaning up the sump Friday, April 26.

CAX-100-LA is non hazardous after drying solid, but contains 3% toluene in liquid form. In liquid or wet solid form, it must be disposed of as Washington State Dangerous Waste.

An Incident Report has been filled out to document this event. Please contact Tom Foulds, at the number below, if you have any questions. The CAX-100-LA safety tip sheet and MSDS has been enclosed for your information.
